

Tips to sell your house

To ensure that your house always presents its best side to interested buyers, we recommend:

Keeping the inside of your house neat & clean, including dishes & washing

Ensuring that your garden is looked after

If you have a swimming pool, ensure that it's always clean

Keep this in mind for photos to market your house, as well as when people come to view your house and on show days.

When vacating, remember to do the following:

- ✓ On the day you move out / in, take photos of the water and electricity meters.
- ✓ Within 14 days of registration, go to the municipality to close / open your new services account.
- ✓ If you have prepaid electricity, close your account with the relevant company.
- ✓ Close all running accounts (e.g. security services)
- ✓ Write down instructions for: borehole, swimming pool pump, prepaid electricity meters, etc.
